## Equity Market Review & Outlook:

The KSE-100 Index showed upward momentum in December 2025 as the benchmark index closed at a monthly high of **174,054** as of 31 Dec, up 4.4% MoM (+7,377 points), reflecting investor confidence mainly due to improving macroeconomic factors and economic stability.

The market activity increased as the average value traded in Dec'25 was PKR **43.4 bn**, up 25% MoM while the average daily volume traded was **864.5 mn** shares, up 6% MoM. In terms of investor flows, **Banks (-USD 1284.6 mn)**, **individual investors (+USD 41.38 mn)**, and **Companies (+USD 1450.8 mn)** were the major Buyers. Conversely, **Mutual Funds (-USD 78.4 mn)** and **Foreign Investors (-USD 52.4 mn)** were the net seller during the outgoing month.

Several positive triggers emerged during the month, resulting in bulls capitalizing on favorable news flow. Pakistan witnessed several important political and macroeconomic developments shaping market sentiment. Field Marshal Asim Munir was notified as Pakistan's first Chief of Defence Forces, marking a key institutional milestone. On the monetary front, the SBP reduced the policy rate by 50bps to **10.5%** in its Dec Monetary Policy Committee (MPC) meeting, supported by easing inflation, with NCPI recorded at **5.6%** YoY in Dec compared to 6.1% in Nov.

External account indicators remained mixed, as Pakistan received USD **1.2 bn** from the IMF following the completion of Extended Fund Facility (EFF) and Resilience and Sustainability Facility (RSF) reviews, while Saudi Arabia rolled over its **USD 3 bn** deposit for another year. The current account posted a surplus of USD 100 mn in November; however, the 5MFY26 trade deficit widened by 30% YoY despite a 9% YoY increase in remittances.

On the fiscal and reform front, the government successfully privatized a 75% stake in PIA for PKR 135 Bn, with the winning bid submitted by a consortium led by Arif Habib Group, while the 11th NFC inaugural meeting commenced with a focus on equitable resource distribution. Additionally, Pakistan announced plans to issue USD 250 Mn Panda Bonds, efforts continued to resolve gas circular debt of PKR 1.7 trillion, and OGRA notified reductions of 1% and 7% in MS and HSD prices, respectively, during the month.

Looking ahead, market is expected to maintain its momentum as the market continues to trade below its historical valuation levels, with a **forward P/E of 7.8x**. These metrics indicate compelling entry opportunities for investors focused on **medium- to long-term growth**.

(mn shares)

# Economy and Money Market Review & Outlook:

## Economic Review:

On December 15, the MPC unexpectedly reduced the policy rate by 50bps to 10.5%, citing contained inflation, improving economic activity, and sufficient real interest rates to anchor medium-term price stability, while supporting sustainable growth. Further bolstering multilateral support, the World Bank's Board of Executive Directors approved USD 700mn in financing on December 19 under the Public Resources for Inclusive Development – Multiphase Programmatic Approach (PRID-MPA), aimed at strengthening fiscal systems, advancing tax and subsidy reforms, and enhancing service delivery (with USD 600mn for federal programs and USD 100mn for Sindh province). The government's reform commitments, including fiscal consolidation, energy-sector restructuring, and market-based exchange rate management, remained intact, lending credibility to the stabilization framework. Overall sentiment improved as external financing prospects brightened and the authorities emphasized their intention to stay aligned with the IMF program.

External sector dynamics in December reflected a mix of pressure and resilience. External-sector stress increased as trade data from PBS revealed a further widening of the trade deficit. Exports dropped sharply by ~20.4% YoY to USD 2.32bn, while imports rose by ~2% to USD 6.02bn, resulting in a monthly trade deficit of approximately USD 3.7bn. On a MoM basis, exports declined compared with November, while imports increased, resulting in a trade gap ~29% wider than the previous month. SBP reserves rose to around USD 15.9bn during the month, helping strengthen overall liquid reserves. The Pakistani rupee traded within a tight band, closing the month near PKR 280 per USD, reflecting stable FX market conditions and adequate liquidity. Inflation remained broadly contained for Dec'25, and posted a marginal downtick, arriving at 5.6%YoY/0.3%MoM. FYTD CPI now stands at 5.15%YoY. Additionally, CPI in Urban areas increased by 5.8%YoY (6.1%YoY last month), while CPI in Rural areas increased by 5.4%YoY (6.0% YoY last month). Hence, inflation continued to reflect moderation and slowdown in momentum.

On the fiscal front, FBR provisionally collected PKR 6.154tn during 6M FY26, falling short of the targeted PKR 6.49tn for the period, resulting in a shortfall of PKR 336bn. Revenue performance remained steady depicting a growth of ~10% YoY.

## Money Market Review:

SBP conducted two T-Bill and PIB Auctions during the month, and SBP raised a combined PKR 1.172trn from T-bills and 10-year PIB-Floating Rate instruments. T-bills alone accounted for PKR 981.69 bn, with strong participation across tenors. Cut-off yields largely softened slightly compared to late November auctions, with 1M cut off yield at 10.85%, 3M at 10.99% and 6M at 11.00% and the 12M remained near 11.27%.

SBP was able to raise a total of PKR 1.02 trn in separate auctions of PIBs and T-bills on December 24, 2025, indicating strong investor demand due to the declining short-term interest rate. The government raised PKR 114.48 bn against the 10-year Floating Rate. SBP raised PKR 911.22bn through T-bills and acceptances were registered in all the tenors, with the 12M T-bill raising the most funds, followed by 3M and 1M tenors. It is important to note that cut-off yields decreased for all maturities. Cut offs stood at 10.4859%/ 10.4878%/ 10.4799% and 10.4880% for 1M/3M/6M and 12M respectively. The decline in the yields of T-bills especially in the 12M tenor indicates an increasing investor confidence on the economic stability in the near future and anticipation of a tamed inflationary trend. The over-subscription of both the PIB and the T-bill auctions also points to the high liquidity of the banking sector and the continued demand for government securities.

## INVESTMENT OBJECTIVE

The Index strategy would be consumer focused and would comprise of a maximum of 20 stocks. The ETFs focuses on sectors which are direct beneficiaries of growing consumer demand in the country which is anticipated to strengthen further in wake of economic recovery, low interest rate environment & various packages announced by the Government etc. Pakistan's GDP growth has always been driven by strong local demand due to very favorable demographics where a young and robust population takes the driving seat on consumption side. The ETF therefore will provide as concentrated avenue to investors that are planning to play the consumer demand story of the country.
