Equity Market Review & Outlook:

The KSE-100 index showed strong recovery in the month of April, rising 14,251 points (up 9.6% MoM) from March's close of 148,743 points to close at 162,994 points. The gain was largely driven by improved investor sentiment after a temporary ceasefire was achieved, mediated in Pakistan, between the United States and Iran, that led to positivity in Pakistan's equity market, as the international oil prices also receded. The rally lost momentum toward the latter part of the month as geopolitical concerns resurfaced. Delays in second round of peace negotiations particularly due to U.S. demands for Iran to scale back its nuclear program weighed on investor confidence, resulting in heightened volatility and selling pressure towards the end of the month.

Investor flows highlighted banks, insurance and foreign corporate as major sellers with outflows of USD 19.4 million, USD 35.3 million, and USD 15.2 million respectively. Conversely, individuals and companies emerged as net buyers with inflows of USD 59.4 million and USD 14.9 million. Average daily traded volume and average traded value during the month were recorded at 928mn shares (up 91% MoM) and USD 148 million (up 49% MoM), respectively. Looking ahead, the performance of the KSE-100 Index is expected to remain closely tied to geopolitical developments. Any de-escalation or improvement in the geopolitical environment could help drive a near-term recovery in the market.

Economy and Money Market Review & Outlook:

Economic Review:

Pakistan's macroeconomic landscape in April 2026 continued to navigate global uncertainties stemming from geopolitical tensions and commodity price fluctuations. Authorities maintained a strong focus on macroeconomic stability. In response to rising inflation risks, SBP raised the policy rate by 100 basis points to 11.5% in its April 2026 meeting, adopting a tighter monetary stance.

CPI inflation returned to double digits, rising sharply to 10.9% YoY in April from 7.3% in March, an increase of 360 basis points. On a MoM basis, inflation rose by 2.5%. The surge was broad-based, driven particularly by higher prices in housing & utilities, transport, and food items. On the real economy side, LSM continued to show solid momentum with cumulative growth of around 5.9%, supported by sectors such as automobiles, apparel, food, and petroleum. The government and SBP have projected FY26 GDP growth around 3.75–4.0%, with risks tilted toward the lower end due to external headwinds.

External sector dynamics remained relatively resilient, underpinned by strong remittance inflows of USD 3.83bn in March, taking 9MFY26 cumulative to 30.3bn. The current account recorded a healthy surplus of USD 1.07bn in March, bringing the 9MFY26 cumulative position to a small surplus of around USD 8.17 million. SBP expects CAD to remain contained within 0–1% of GDP in FY26. FX reserves showed stability amid active liability management. During April, Pakistan repaid a total of approximately USD 3.45 billion in deposits to the UAE. This dip in reserves was comfortably managed following the receipt of a USD 3 billion support package from Saudi Arabia. As of late April, SBP's foreign exchange reserves stood at approximately USD 15.1 billion, while total liquid foreign reserves reached around USD 20.6 billion. The PKR remained broadly stable closing the month near PKR 278–280/USD.

On the fiscal front, FBR provisionally collected PKR 10.26 trillion during 10MFY26 (Jul-Apr), reflecting roughly 10.5% YoY growth but falling short of the target of around PKR 10.945 trillion by approximately PKR 684 billion. April alone saw collections of PKR 956 billion against a target of PKR 1,029 billion. The landmark Super Tax ruling is expected to unlock additional revenues in installments by June 2026, helping to bridge part of the gap and support fiscal buffers heading into the final quarter. Sharp rise in inflation prompted monetary tightening, while external risks from geopolitical tensions warrant continued vigilance. Sustained fiscal consolidation, export growth, and structural reforms will be key to maintaining stability and growth momentum through the remainder of FY26.

Money Market Review:

Prolonged geopolitical uncertainties in the Middle East and increasing global commodity prices triggered a significant repricing in local debt markets. Yields drifted higher across most tenors, reflecting reduced expectations for monetary easing and growing investor caution. During April 2026, SBP conducted two major MTB auctions. In the auction held on April 15, 2026, GoP raised approximately Rs1.50 trillion against strong participation of over PKR 4.25tn. Cut-off yields were reduced for shorter tenors, standing at 10.6982%, 11.4380%, 11.1549%, and 11.8900% for 1M/3M/6M and 12M respectively. In the subsequent auction on April 29, 2026, held immediately after the policy rate hike, the government raised another PKR 1.34 trillion against a target of PKR 650 bn, with total participation exceeding PKR 4.25 trillion. Cut-off yields rose notably to 11.4785%/11.8398%/11.9801%, and 12.0999% for 1M/3M/6M and 12M respectively. The Monetary Policy Committee, in its meeting on April 27, 2026, decided to increase the policy rate by 100 basis points to 11.50% effective April 28, 2026, citing rising inflation, persistent cost pressures, and significant risks from the prolonged Middle East conflict, including higher global energy and commodity prices. A fixed-rate PIB auction was also conducted towards the end of the month, and SBP rejected all bids received during the same.

INVESTMENT OBJECTIVE

The Index strategy would be consumer focused and would comprise of a maximum of 20 stocks. The ETFs focuses on sectors which are direct beneficiaries of growing consumer demand in the country which is anticipated to strengthen further in wake of economic recovery, low interest rate environment & various packages announced by the Government etc. Pakistan's GDP growth has always been driven by strong local demand due to very favorable demographics where a young and robust population takes the driving seat on consumption side. The ETF therefore will provide as concentrated avenue to investors that are planning to play the consumer demand story of the country.
