Equity Market Review & Outlook:

The KSE-100 index showed recovery in the month of May, rising 10,969 points (up 6.73% MoM) from April's close of 162,994 points with the index closing at 173,963 points on 29th May. The gain was largely driven by improved investor sentiment amid progress in US-Iran talks and 60-day extension of ceasefire. The month featured a robust single day surge of ~6,962 points on 6th May on the back of US-Iran conflict de-escalation where President Donald Trump paused military operations in the strait of Hormuz paving way for diplomatic agreements. However, delayed peace talks and rise in global oil prices in the mid of may cause the index to sharply correct by around 9,000 points.

The concerns over oil supply began to ease, however, trading activity remained subdued towards the end of the month before Eid holidays. The average trading volumes stood at 708.6 million shares (down 23.6% MoM) while average traded value clocked in at USD 111.7 million (down 24.5% MoM). Investor flows highlighted insurance, banks, and brokers as net buyers with inflows of USD 17.9 million, USD 7.64 million, and USD 5.51 million whereas mutual funds and companies emerged as major sellers with outflows of USD 13.42 million and USD 6.81 million. The index is currently trading at a forward P/E of 8.0x. Looking ahead, the performance of the KSE-100 Index is largely tied to geopolitical developments and the upcoming FY27 Budget announcement expected in early June.

The Budget is expected to remain a key market catalyst in the near term along with MPC meeting in June 2026, with investors focusing on the government's ability to balance IMF commitments, fiscal consolidation, and growth-supportive measures.

Economy and Money Market Review & Outlook:

Economic Review:

Pakistan's macroeconomic landscape in May 2026 remained under pressure as regional geopolitical tensions and global energy cost spikes continued to test domestic stabilization efforts. Authorities maintained a vigilant stance on macroeconomic vulnerabilities. The State Bank of Pakistan (SBP) held its policy rate steady at 11.5% during May, sustaining a restrictive monetary stance to anchor long-term expectations.

CPI inflation accelerated further into double digits, climbing to a 23-month high of 11.7% YoY in May from 10.9% in April—an increase of 80 basis points. On a MoM basis, consumer prices edged up by 0.5%, reflecting a slight moderation in momentum compared to April's sharp 2.5% jump. The lingering inflationary pressures were primarily stoked by soaring transport costs (up 36.8% YoY) and elevated housing & utilities prices (16.8% YoY), heavily impacted by conflict-driven energy price shocks.

On the real economy side, economic momentum faced subtle friction from broader industrial cooling and trade disruptions, though large-scale industrial indicators managed to hold onto baseline support. The central bank maintained its FY26 GDP growth projection in the realm of 3.5–4.5%, while underlying risks hovered near the lower bound due to persistent external headwinds and structural challenges. External sector dynamics continued to demonstrate relative resilience, anchored by robust buffers. Gross foreign exchange reserves showed notable improvement; total liquid foreign reserves climbed to approximately USD 22.65 billion by May, with SBP's own reserves strengthening to USD 17.15 billion. This buildup was supported by sustained remittance flows, which are on track to approach cumulative FY26 projections of USD 41.2 billion. The PKR maintained its steady trajectory within a tight, managed band, closing out the month near PKR 278.2–278.6/USD amid orderly market flows.

On the fiscal front, revenue collection faced widening gaps due to import-stage slowdowns and shorter operational windows over the holiday season. The FBR provisionally collected PKR 967 billion in May, registering a 7% YoY growth but missing its downward-revised monthly target of PKR 994 billion by PKR 28 billion. This brought the cumulative 11MFY26 (Jul-May) collection to PKR 11.232 trillion against a revised target of PKR 11.257 trillion. To absorb this fiscal slippage, strong petroleum levy collections—reaching PKR 1.205 trillion by the third quarter—emerged as a vital non-tax buffer ahead of the final fiscal stretch.

Money Market Review:

Geopolitical tensions in the Middle East continued to influence market sentiment, though some de-escalation signals emerged mid-month and elevated global commodity prices, particularly energy kept inflationary concerns intact. Local debt markets experienced a modest upward drift in yields compared to late April, reflecting ongoing caution and reduced expectations of immediate further monetary easing. In the auction held on May 13, 2026 (settlement May 14), the GoP raised approximately PKR 916 billion against strong participation. Cut-off yields increased across the curve, standing at 11.3703%/12.0848%/12.3499% and 12.4999% for 1M/3M/6M and 12M respectively. In the subsequent auction on May 20, 2026, the government raised around Rs688 billion. Cut-off yields were recorded at 12.2300%/12.4904%/12.4999% and 12.5900% for 1M/3M/6M and 12M respectively.

A fixed-rate PIB auction was conducted on May 18, 2026, where SBP raised approximately Rs180 billion. Yields rose notably, with cut-off rates at 13.2500% for 2Y & 3Y, 12.9490% for 5Y & 10Y, and 12.9000% for 15Y. Overall, May 2026 reflected a phase of yield consolidation at higher levels following April's policy adjustment, with strong investor participation in short-term instruments amid cautious market positioning.

All investments in mutual funds are subject to market risks. Past performance is not necessarily indicative of future results. Please read the Offering Document to understand the investment policies and risks involved. All returns are calculated assuming reinvested dividends. Performance data does not include the cost incurred directly by an investor in the form of sales load etc. Please be advised that the sales load (including Front End Load, Back End Load and Contingent Load) up to 3.00% or 1.50% as may be applicable, may be charged on the investment and/or upon redemption of funds, at the discretion of the management company.

INVESTMENT OBJECTIVE

The investment objective of Alfalah GHP Income Fund (AGIF) is to minimize risk, construct a liquid portfolio of fixed income instruments and provide competitive returns to the Unit Holders. The management team shall ensure the active implementation of prudent investment practices, the highest professional standards and compliance with applicable laws.

INVESTMENT OBJECTIVE

Alfalah Strategic Allocation Capital Preservation Plan-II (ASACPPII) is a Constant Proportion Portfolio Insurance (CPPI) based Allocation Plan under "Alfalah Strategic Allocation Fund" with an objective to earn a potentially high return through dynamic asset allocation between Equity Scheme and Income/Money Market Scheme based Collective Investment Schemes (CIS) using CPPI methodology, while providing Capital Preservation of the Initial Investment Value at maturity of the plan based on the Fund Manager's outlook on the assets classes

INVESTMENT OBJECTIVE

The Index strategy would be consumer focused and would comprise of a maximum of 20 stocks. The ETFs focuses on sectors which are direct beneficiaries of growing consumer demand in the country which is anticipated to strengthen further in wake of economic recovery, low interest rate environment & various packages announced by the Government etc. Pakistan's GDP growth has always been driven by strong local demand due to very favorable demographics where a young and robust population takes the driving seat on consumption side. The ETF therefore will provide as concentrated avenue to investors that are planning to play the consumer demand story of the country.
