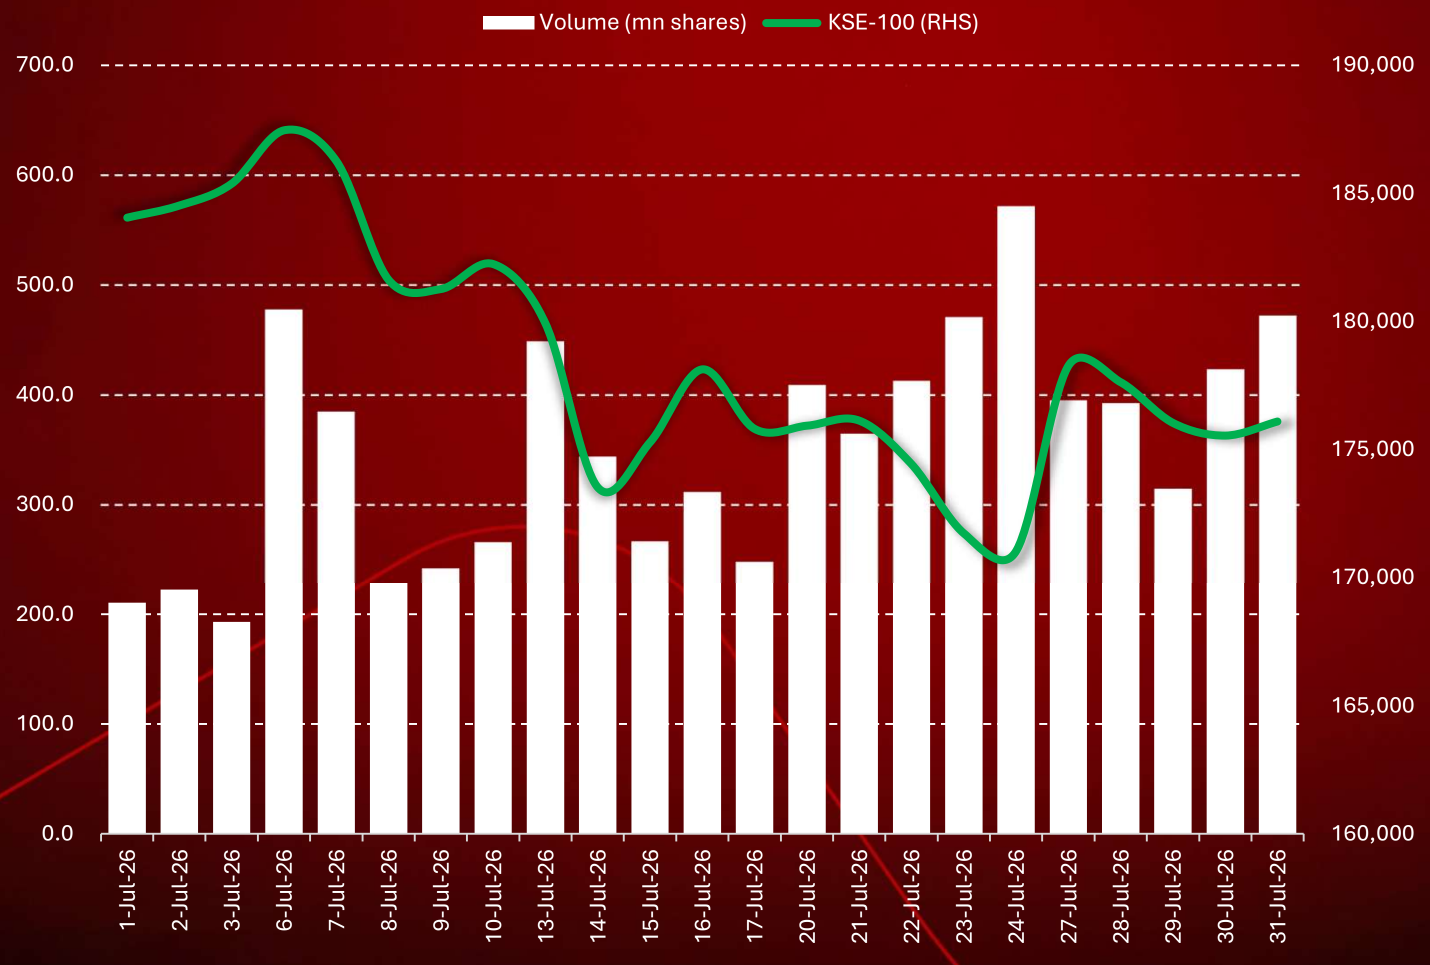
Equity Market Review & Outlook:

The KSE-100 Index came under pressure during July, declining 4,207 points (down 2.33% MoM) from June's close of 180,301.70 points to close the month at 176,094.11 points in July. The market opened in July on a strong footing, with the benchmark index reaching a fresh all-time high above 187,000 points, supported by continued optimism surrounding Pakistan's improving macroeconomic outlook and strong institutional buying. However, sentiment deteriorated sharply during the second half of the month as escalating geopolitical tensions between the United States and Iran raised concerns over regional stability and the potential disruption of global oil supplies. The resulting increase in international oil prices, coupled with heightened risk aversion, triggered broad-based selling across the market. Investor sentiment also remained cautious ahead of the SBP's MPC meeting, where the central bank maintained the policy rate at 11.5%, in line with market expectations, reinforcing expectations of monetary policy stability.

Trading activity remained robust during July, with average daily trading volume increasing by 15.2% MoM to 351.06 million shares from 304.66 million shares in June. Activity was particularly strong during the first half of the month, when average daily trading volume reached 406.98 million shares, reflecting strong investor participation as the market continued to rally. However, volumes moderated during the second half of the month to an average of 299.80 million shares as geopolitical tensions escalated and investors adopted a more cautious stance.

The KSE-100 Index is currently trading at a forward P/E of ~6.9x still attractive relative to its historical average. Looking ahead, market performance is expected to remain largely driven by geopolitical developments in the Middle East, the trajectory of international oil prices, and the domestic interest rate outlook. Following SBP's decision to maintain the policy rate at 11.5%, investors are expected to closely monitor upcoming inflation data and any changes in monetary policy expectations. While external risks may continue to drive near-term market volatility, improving macroeconomic fundamentals and resilient corporate earnings are expected to provide support to the market over the medium term.



Alfalah Investments

RATED AM1 by VIS & PACRA

Economy and Money Market Review & Outlook:

Economic Review:

Pakistan’s macroeconomic indicators continued to show signs of gradual stabilization in July 2026, the first month of FY27, even as renewed Middle East tensions introduced fresh uncertainty around global energy prices and the external outlook. SBP maintained a cautious policy stance, keeping the policy rate intact at 11.5% while inflation eased back into single digits, as CPI inflation moderated to 9.2% YoY in July, down sharply from June’s 11.1% YoY. The slowdown was driven mainly by softer housing/utilities and transport costs, partially offset by firmer food inflation. On a MoM basis, consumer prices rose 1.2%, reversing June’s 0.3% decline. Urban CPI stood at 8.7% YoY and rural at 9.9% YoY. SBP has projected FY27 average inflation to range between 5-7%.

External buffers experienced volatility early in the new fiscal year due to debt repayments (including a sizeable Chinese commercial loan repayment). Total liquid foreign exchange reserves stood at USD 22.44 billion as of July 24, 2026, which included SBP holdings of USD 17.03 billion and commercial banks of USD 5.41 billion. The SBP continues to target further reserve accumulation (around USD 20.2 billion by end-December 2026).

Pakistan's trade deficit widened to USD 3.95bn in July 2026, up 25.17% YoY, though it narrowed 15.22% MoM from USD 4.66bn in June. Exports rose to USD 2.94bn (up 9.54% YoY, 31.09% MoM), reflecting a notable pickup in external demand. Imports reached USD 6.89bn, up 17.99% YoY but broadly flat MoM (-0.17%), suggesting import demand has plateaued. The MoM narrowing was thus driven primarily by export strength rather than import compression, a relatively encouraging signal for the current account.

The PKR held a managed, relatively stable trajectory and appreciated modestly, closing July near PKR 277.8/USD. Remittances remained a key pillar of external resilience. Full-year FY26 inflows reached a record USD 41.6bn (up 8.6% YoY), with June at USD 3.47bn. The SBP projects remittances rising further to around USD 44bn in FY27.

Overall, July data reinforced the narrative of gradual stabilization on the inflation and fiscal fronts, with the central bank prioritizing caution amid external geopolitical risks. Remittances and reserve management remain critical buffers as the economy navigates the early months of FY27.

Money Market Review:

During the month of July 2026, yields generally drifted lower in the early part of the month before showing mixed movements later, reflecting strong demand at the short end and some caution on longer tenors ahead of the Monetary Policy Committee meeting.

Two fortnightly T-bill auctions were held on July 8 and July 22, 2026. In the first auction, the government raised approximately Rs 2,068 billion (face value) against a target of Rs 2,400 billion. Cut-off yields declined notably from the previous month, settling at 11.3968%/11.3978%/11.4375%/11.4880% for 1M/3M/6M/12M T-bills respectively. In the subsequent auction on July 22, roughly Rs 768 billion was raised (against a target of around Rs 800 billion). Cut-off yields were 11.3504%/11.5154%/11.7951%/11.9938% for 1M/3M/6M/12M. Short-end yields edged slightly lower while 6M and 12M yields rose from the July 8 levels.

In the fixed-rate PIB auction held on July 2, 2026, the government raised approximately Rs 615 billion across 2-year, 3-year, 5-year, 10-year and 15-year tenors against strong participation. Accepted cut-off yields were 11.4450%/11.4900%/11.6260%/12.1400%/12.2850% for 2Y/3Y/5Y/10Y/15Y — marking a clear decline of 47–70 basis points from the June 17 auction levels.

Overall, July 2026 reflected a phase of yield consolidation at lower levels in the first half of the month, supported by robust investor demand and the continuation of the 11.5% policy rate (held unchanged at the July 27 MPC meeting). Longer-tenor yields firming later in the month signalled some caution around the medium-term inflation and external risk outlook.

Month End PKRV Yields

INVESTMENT OBJECTIVE

The Index strategy would be consumer focused and would comprise of a maximum of 20 stocks. The ETFs focuses on sectors which are direct beneficiaries of growing consumer demand in the country which is anticipated to strengthen further in wake of economic recovery, low interest rate environment & various packages announced by the Government etc. Pakistan's GDP growth has always been driven by strong local demand due to very favorable demographics where a young and robust population takes the driving seat on consumption side. The ETF therefore will provide as concentrated avenue to investors that are planning to play the consumer demand story of the country.
